PROFILE

Full-stack developer with 3+ years of experience building production systems across AI, geospatial technology, and aviation. Experienced across Vue, React, TypeScript, Node.js, and Python, with growing ownership of front-end architecture, technical delivery, code quality, and client communication.

Languages & Front End: JavaScript, TypeScript, React, Redux, Angular, Vue, HTML, CSS/SCSS (Sass)

Back End & APIs: Node.js, Express, Python, REST APIs, WebSockets, JWT Authentication

Databases: SQL, SQL Server, MongoDB, SQLite, RavenDB

Tools & Platforms: Git, Docker, Jest, Electron, PWA

EXPERIENCE

Full Stack Developer

2026 – Present

qbq · Tel Aviv

- Own front-end architecture and lead code reviews for an AI-powered commercial real-estate planning platform built with Vue and Python.
- Develop information-dense analytics interfaces that make design alternatives easy to compare across devices, screen sizes, and exported formats.
- Deliver features across the Vue front end and Python back end, resolve production issues, and improve performance and maintainability across the application.

Full Stack Developer

2024 – 2026

Webiks · Tel Aviv

- Built and maintained a low-latency, real-time application with React, Node.js, and Electron, streaming continuous updates from complex geospatial computations.
- Optimized high-volume geospatial processing, shortening feedback loops and making live operational data more responsive.
- Visualized live fleet and asset computations on interactive maps, giving users immediate visibility into operational status.
- Served as acting senior developer during the team lead's extended absence, leading code reviews, sprint planning, client communication, and final-stage delivery.

Full Stack Developer

2023 – 2024

IDMR Solutions · Ra'anana

- Modernized key areas of a 20-year-old aviation management platform built across SQL Server, XSLT, and jQuery.
- Improved business-critical workflows while preserving the stability and performance of the legacy system.
- Built complex SQL queries and stored procedures supporting core business logic, operational workflows, and reporting.
- Delivered new features and user interfaces and authored technical specifications in Axosoft.

SELECTED PROJECTS

Fatal Combat — Retro 2D fighting game powered by a custom Canvas engine, with CPU opponents, local multiplayer, and real-time online battles synchronized through WebSockets.

Vue 3 · TypeScript · Pinia · FastAPI · SQLAlchemy · WebSockets · Canvas · Docker [GitHub](#) · [Live](#)

Kceli — Health-tracking application that calculates TDEE, estimates meal calories with the OpenAI API, and visualizes nutrition, workouts, goals, and weight trends.

React · TypeScript · Node.js · Express · MongoDB · Mongoose [GitHub](#) · [Live](#)

DevQuiz — Developer learning platform backed by RavenDB, with thousands of questions across JavaScript, React, Node.js, databases, and web fundamentals.

Vite · React · TypeScript · Node.js · RavenDB [GitHub](#) · [Live](#)

EDUCATION

Full-Stack Development — Coding Academy 2022

Bachelor of Arts in Communication — Ariel University 2017 – 2020

LANGUAGES

Hebrew — Native · English — Professional Working Proficiency
