

Eshel Eyni

Full Stack Developer

esheleyni@gmail.com | 054-647-5787 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFILE

Full stack developer with 3+ years of professional experience building and shipping production web applications end to end. Skilled on the front end with React, Vue, and TypeScript, and on the server with Node.js and Python, delivering features in Agile teams across SaaS, security, and enterprise products.

Languages & Frameworks: JavaScript, TypeScript, React, Redux, Angular, Vue, Node.js, Express, Python, HTML, CSS/SCSS (Sass)

Databases & Storage: MongoDB, Mongoose, SQL Server, SQLite, RavenDB

APIs & Real-Time: REST APIs, WebSockets, JWT auth, OpenAI API, Google Maps API, YouTube API

Tools & Practices: Vite, Electron, Jest, Docker, Kubernetes, Git, PWA, Agile / Scrum

EXPERIENCE

Full Stack Developer

2026 – Present

QbiqAI · Tel Aviv

- Own front-end architecture and conduct code reviews for an AI-powered commercial real-estate planning platform built with Vue and Python.
- Develop information-dense analytics interfaces that compare design alternatives while remaining clear and responsive across devices, screen sizes, and exported formats.
- Deliver features end to end across the Vue front end and Python back end, resolve production issues, and improve application performance and maintainability.

Full Stack Developer

2024 – 2026

Webiks · Tel Aviv

- Built and maintained a real-time application using React, Node.js, and Electron, delivering continuous updates from complex geospatial computations under strict low-latency requirements.
- Optimized high-volume geospatial processing to deliver faster user feedback and improve responsiveness over the previous solution.
- Delivered dynamic projection of live spatial computations onto interactive maps — e.g., tracking fleets and assets in real time so users could monitor operational status at a glance.
- Served as acting senior developer during the team lead's maternity leave: led code reviews, sprint planning, and daily meetings; owned client communication; and guided the project through its final months.

Full Stack Developer

2023 – 2024

IDMR Solutions · Ra'anana

- Worked across a large, 25+ year-old aviation management system built on a mix of legacy and modern technologies (SQL Server, XSLT, jQuery).
- Uplifted key parts of the system to modern technology, navigating and improving complex, business-critical areas while maintaining stability and performance.
- Worked intensively at the database level, building complex queries and stored procedures to power core business logic and reporting.
- Built new features and user interfaces and authored technical specifications in Axosoft.

SELECTED PROJECTS

Fatal Combat — Retro-style 2D fighting game with local and online multiplayer, real-time WebSocket battles, room invitations, CPU opponents, JWT authentication, and canvas-based animations.

Vue 3 · TypeScript · Pinia · FastAPI · SQLAlchemy · WebSockets · Canvas · Docker [GitHub](#) · [Live](#)

Kceli — Weight-loss tracker that calculates TDEE and logs calories via the OpenAI API, with a color-coded calendar, workout planner, and interactive progress graphs.

React · TypeScript · Node.js · Express · MongoDB · Mongoose [GitHub](#) · [Live](#)

DevQuiz — Interactive quiz app for developers spanning HTML, CSS, JavaScript, React, and Node.js, backed by a database of thousands of questions.

Vite · React · TypeScript · Node.js · RavenDB [GitHub](#) · [Live](#)

EDUCATION

Full Stack Development — Coding Academy	2022
B.A. in Arts, Communication & Film — Ariel University	2017 – 2020

LANGUAGES

Hebrew — Native · English — Professional Working Proficiency
